

Boehringer Ingelheim Symposium

Friday 24th June 2022

AGENDA

18:00 – 18:05	Introduction	<i>Prof. T Stulnig</i>
18:05 – 18:30	“From EMPA REG OUTCOME to EMPEROR: driving a paradigm shift in diabetes” <i>P Seferovic</i>	
18:30 – 18:50	Expert panel discussion	
18:50 – 19:00	Q&A session	

Prof. Thomas Stulnig
Austria

Prof. Petar Seferović
Serbia

Prof. Nebojša Lalić
Serbia

From EMPA REG OUTCOME to EMPEROR: driving a paradigm shift in diabetes

The world of diabetes has changed profoundly in September 2015, when the results of EMPA REG OUTCOME[®] were disclosed, and ever since treatment paradigms shifted from glucocentricity to the holistic view reflected in current guidelines. A surprising outcome of EMPA REG OUTCOME[®] was the reduction of risk for hospitalization for heart failure, making it a focus of following studies, including dedicated heart failure trials. With the understanding of the early incidence and significant prevalence heart failure has in diabetes patients, what can we learn from the available data, and how can we implement it in our clinical practice?
